

TrueNute Micro Nutrient Mix

Thank you for your purchase of **TrueNute Micro Nutrient Mix** from True Aquaponics.

You will need an accurate scale to weigh out the TrueNute Micro Nutrient Mix for your system.

For every 100 gallons of water in your system, add 5.5 grams of the mix every 3 months for veggie crops and every 2 months for fruiting crops.

Try not to allow the fine dust in the bag to settle to the bottom.
